

International Journal of

SYSTEMS SCIENCE

*The Theory and Practice of Mathematical Modelling, Simulation
Optimization and Control in relation to biological, economic,
industrial and transportation systems*

VOLUME 19

Editor: B. Porter

University of Salford, U.K.

Editorial Board:

S. Arimoto	- - -	Osaka
J. W. Bandler	- -	Hamilton
S. Barnett	- - -	Bradford
J. C. G. Boot	- -	Buffalo
R. C. Conant	- -	Chigago
R. Gorez	- - -	Louvain
S. C. Gupta	- -	Dallas
C. H. Houpis	- -	Ohio
M. Ito	- - -	Nagoya
G. J. Klir	- - -	Binghamton
V. Kučera	- - -	Prague
R. Perret	- - -	Grenoble
R. Rosen	- - -	Halifax
J. K. Sengupta	-	Santa Barbara
Ya. Z. Tsyarkin	- -	Moscow
J. L. Willems	- -	Ghent

Subscription Information

The *International Journal of Systems Science* (ISSN 0020 7721) is published monthly by Taylor & Francis Ltd, 4 John Street, London WC1N 2ET, UK.

Annual Subscription 1989: £415, US\$750.

Second class postage paid at Jamaica, New York 11431. US Postmaster: send address changes to the *International Journal of Systems Science*, Publications Expediting Inc., 200 Meacham Avenue, Elmont, New York 11003. Air freight and mailing in the USA by Publications Expediting Inc., 200 Meacham Avenue, Elmont, New York 11003.

Printed in the UK by Taylor & Francis (Printers) Ltd, Rankine Road, Basingstoke, Hampshire RG24 0PR, UK.

Dollar rates apply to subscribers in all countries except the UK and the Republic of Ireland, where the pound sterling price applies. All subscriptions are payable in advance and all rates include postage. Journals are sent by air to the USA, Canada, Mexico, India, Japan and Australasia at no extra cost. Subscriptions are entered on an annual basis, i.e. January to December. Payment may be made by sterling cheque, dollar cheque, international money order, National Giro, or credit card (Amex, Visa, Mastercard/Access).

Orders originating in the following territories should be sent direct to the local distributor. **Australia:** R. Hill & Son Ltd, 117 Wellington Street, Windsor, Victoria 3181. **New Zealand:** R. Hill & Son Ltd, Private Bag, Newmarket, Auckland 1. **India:** Universal Subscription Agency Pvt. Ltd, 101-102 Community Centre, Malviya Nagar Extn Post Bag No. 8, Saket, New Delhi 110017. **Japan:** Kinokuniya Company Ltd, Journal Department, PO Box 55, Chitose, Tokyo 156. **USA, Canada and Mexico:** Taylor & Francis, Inc., 242 Cherry Street, Philadelphia, Pennsylvania 19106-1906. **UK and all other territories:** Taylor & Francis Ltd, Rankine Road, Basingstoke, Hampshire RG24 0PR.

CONTENTS OF VOLUME 19

NUMBER 1

Bifurcations associated with a double zero of index two and a pair of purely imaginary eigenvalues P. YU and K. HUSEYIN.....	1
Linear optimal control systems by reduced-order observers via orthogonal functions C.-Y. YANG and C.-K. CHEN.....	23
Solution of variational problems via Taylor series C.-Y. YANG and C.-K. CHEN.....	33
Parametric optimization problem for control systems with time delay J. SULARZ.....	41
Parameter identification of distributed parameter systems using spline functions K. HARA, T. YAMAMOTO and K. OUGITA.....	49
Interactive multicriterial choice of variants in problems with weak constraints S. N. BUTKO, A. M. PETROVSKI and V. V. RODIONOV.....	65
Guaranteed absolute stability in the presence of unmodelled dynamics M. DE LA SEN.....	77
Quantitative feedback design of a chemical reactor control system A. IOINOVICI.....	97
Simple general method to analyse the moment stability and sensitivity of non-linear stochastic systems with or without delay G. JUMARIE.....	111
Robust compensator synthesis for dynamic systems subjected to parameter perturbations C.-C. CHIANG and B.-S. CHEN.....	125
Optimal production run for a process having multilevel tool wear M. A. RAHIM and A. RAOUF.....	139
Interactive multi-objective programming technique using random optimization method N. BABA, H. TAKEDA and T. MIYAKE.....	151
Shifted Jacobi series analysis of linear two-point boundary value problems J.-H. CHOU and I.-R. HORNG.....	161
Review of discrete and continuous distributions in replacement models N. KAIJO and S. OSAKI.....	171
Convex optimal control problem involving a class of linear hyperbolic systems with constraints Z. S. WU and K. L. TEO.....	179
Optimal measurement control strategies for natural resource systems A. PAPAKYRIAZIS.....	195
Number of positive eigenvalues of the solution to the discrete Lyapunov matrix equation T. MORI, N. FUKUMA and M. KUWAHARA.....	225

NUMBER 2

Analysis of inventory policies in an integrated production/inventory system with decaying materials	
A. GUNASEKARAN, A. SUBASH BABU and N. RAMASWAMY.....	227
Behaviour of a production system for varying marketing decisions	
A. GUNASEKARAN, A. SUBASH BABU and N. RAMASWAMY.....	241
Algebraic approximation of smooth optimal cyclic control problems	
K. STYCZEŃ.....	251
Solutions of integral equations via Taylor series	
C.-Y. YANG, C.-L. CHEN and C.-K. CHEN.....	265
Analysis of bilinear systems via polynomial series	
C.-Y. YANG and C.-K. CHEN.....	275
Analysis and optimal control of time-varying systems via polynomial series	
C.-Y. YANG and C.-K. CHEN.....	289
Computational algorithms for algebraic operations on multidimensional polynomials	
S. G. TZAFESTAS and N. J. THEODOROU.....	311
Method of flow-based modelling for large-scale systems: the basic idea	
H. HIRATA and Y. SUGAI.....	351
Optimal control of linear time-delay systems via general orthogonal polynomials	
S.-C. TSAY, I. L. WU and T.-T. LEE.....	365
Stability analysis for distributed systems	
S. T. LUO, S. E. BINNEY and W. J. KOLODZIEJ.....	377

NUMBER 3

Simulation study of job shop scheduling with due dates	
T. C. E. CHENG.....	383
Optimal prediction and control in presence of unmodelled dynamics	
M. DE LA SEN.....	391
Robust stabilization of uncertain time-delay systems with sampled feedback	
S.-S. WANG and T.-P. LIN.....	399
Robust stability criteria for single- and large-scale perturbed systems	
W.-J. WANG and T.-T. LEE.....	405
Solutions of convolution integral and integral equations via double general orthogonal polynomials	
T.-T. LEE and Y.-F. CHANG.....	415
Solution of variational problems via general orthogonal polynomials	
S.-C. TSAY and T.-T. LEE.....	431
Systematic design of robust control systems using small gain stability concepts	
G. E. SEVASTON and R. W. LONGMAN.....	439
Exact eigenvalue placement for two-time-scale discrete-time systems	
M. T. TRAN and M. E. SAWAN.....	453

Double generalized orthogonal polynomial series for the solution of integral equations	
M.-L. WANG, R.-Y. CHANG and S.-Y. YANG	459
Parameter identification of time-varying system via generalized orthogonal polynomials	
R.-Y. CHANG, S.-Y. YANG and M.-L. WANG	471
Parameter estimation in large-scale systems using sequential decomposition	
M. A. SULTAN, M. F. HASSAN and J. L. CALVET.....	487
Two-stage procedure for parameter estimation in large-scale interconnected linear zero-memory systems	
Z. HASIEWICZ.....	497
Erratum.....	517

NUMBER 4

Prediction error estimator for non-linear stochastic systems	
I. J. LEONTARITIS and S. A. BILLINGS	519
Gas turbine modelling using pseudo-bond graphs	
N. J. KRIKELIS and F. PAPADAKIS.....	537
Application of explicit criterion minimization in adaptive control	
F. R. LIANN and D. W. CLARKE.....	551
Optimal estimators for time-averaged measurement systems	
S. OMATU and J. H. SEINFELD.....	573
Design of observers for non-linear time-varying systems	
E. YAZ.....	583
Human error modelling of parallel and standby redundant systems	
B. S. DHILLON and S. N. RAYAPATI.....	589
Distributed parameter systems analysis by tracking stationary points of their states	
E. RAFAJLOWICZ.....	613
Two-dimensional state-space model for bilateral linear image processing	
S. TALAHMEH and H. SINGH.....	621
Generalization of the Lyapunov equation to non-linear systems	
S. P. BANKS.....	629
Meaning of state-space representation and its relation to canonical form. Part 2. Controllability and constructibility	
B. NAKANO, J. IJIMA and R. SATO	637
Extensions of innovations dual control	
T. ISHIHARA, K.-I. ABE and H. TAKEDA.....	653

NUMBER 5

Continuous dependence of the solution of a system of differential equations with impulses on the initial condition and a parameter in the presence of beating	
A. B. DISHLIEV and D. D. BAINOV	669

Methodology for quantitative evaluation and selection of complex systems M. G. DARWISH and S. H. AHMED	683
Error analysis of system identification by block-pulse functions C.-S. HSU and W.-L. CHEN	691
Convergence of the doubling algorithm for the discrete-time algebraic Riccati equation M. KIMURA	701
Input-output representations of spectral systems and adaptive controls T. KOBAYASHI	713
Moment stability of linear stochastic non-triangular large-scale systems K. POPP, L. SOCHA and H. WINDRICH	733
Robust stabilization against non-linear time-varying uncertainties C.-C. CHIANG and B.-S. CHEN	747
Multivariable discrete-time model reference adaptive control with input-smoothing property and its application K. KONISHI, K. MAEGAWA, T. YOSHIMURA and H. ISHIHARA	761
Robust efficiency measures in a stochastic efficiency model J. K. SENGUPTA	779
Design of H^∞-optimal feedback controllers for model following A. K. EL-SAKKARY	793
Integrating physical system-theoretic and entropy-maximizing approaches of transport analysis M. C. MATHUR and P. S. SATSANGI	803

NUMBER 6

Optimal design modifications by geometric programming and constrained stochastic network models A. CHARNES, W. W. COOPER, B. GOLANY and J. MASTERS	825
On some models for developmental systems. Part IX. Generalized generating word and genetic code J.-C. GILLE, S. WĘGRZYN and P. VIDAL	845
Energy modelling for the national economy—generalized model based on a physical systems theory approach A. K. VIJ, SUSHIL and P. VRAT	857
Sliding regimes on slow manifolds of systems with fast actuators H. SIRA-RAMIREZ	875
Minimax method of measuring productive efficiency J. K. SENGUPTA and R. E. SFEIR	889
On-line identification scheme using adaptive filters R. DORAISWAMI	905
Role of sample period on transients, robustness and sensitivity in optimally designed digital control systems C. P. DIDUCH and R. DORAISWAMI	921
Mean-square asymptotic stability of linear hereditary systems T. SASAGAWA	935

Stable reduction of linear discrete-time systems via multipoint squared-magnitude CFE C. HWANG and M.-Y. CHEN.....	945
Stabilization of multivariable feedback systems with multiple time delays H.-C. LU and B.-S. CHEN.....	953
Dynamic routing for computer queueing networks N. U. AHMED, T. E. DABBOUS and Y. W. LEE	967
Linear feedback control with prespecified performance measure A. FELIACHI	979
Dynamic shape control for a flexible beam T. KOBAYASHI and Z. H. LUO.....	985
New reduction technique by step error minimization for multivariable systems S. S. LAMBA, R. GOREZ and B. BANDYOPADHYAY.....	999
Output-maximal control policies for cascaded production-inventory systems with control and state constraints J. WARSCHAT and H. J. WUNDERLICH.....	1011
Equivalent cascade versions of observer-based controllers for SISO and MIMO linear systems W. K. N. ANAKWA and M. N. S. SWAMY	1021
Algebraic method for the design of output deadbeat controller J.-H. CHOU and I.-R. HORNG.....	1031
Parameter or non-parameter identification of distributed parameter systems via block-pulse functions J. NING and J. JIONG	1039
Asymptotic analysis of G/G/K queueing-loss system with retrials and heterogeneous servers B. POURBABAI	1047

NUMBER 7

First- and second-order eigensensitivities of matrices with distinct eigenvalues Y.-L. LING and B.-C. WANG.....	1053
Optimal scanning measurement problem for a stochastic distributed-parameter system K. NAKANO and S. SAGARA.....	1069
Efficiency comparisons in input-output systems J. K. SENGUPTA	1085
Self-tuning controller design for systems with arbitrary time delays. Part 1. Theoretical development M. O. TADE, M. M. BAYOUMI and D. W. BACON	1095
Self-tuning controller design for systems with arbitrary time delays. Part 2. Algorithms and simulation examples M. O. TADE, M. M. BAYOUMI and D. W. BACON	1117
Order estimation of AR and ARMA models W. GAWRONSKI and H. G. NATKE.....	1143
Successive parameter estimation of continuous dynamic systems C.-T. LIU and Y.-S. CHOU.....	1149

Capital structure decision in the presence of tax treatment uncertainty J. A. SCHNABEL.....	1159
Comparison of finite element methods for the diffusion problem C. HWANG and C. T. PAN.....	1165
Trajectory sensitivity analysis using discrete Legendre orthogonal polynomials K.-K. SHYU and C. HWANG.....	1181
Optimal error predictors for economic models M. MILANESE, R. TEMPO and A. VICINO.....	1189
Decentralized observer for interconnected systems R. PRASAD, S. I. AHSON and A. K. MAHALANABIS.....	1201
Perturbation theorems for systems with impulse effect P. S. SIMEONOV and D. D. BAINOV.....	1213
Solution of linear dynamic systems with initial or boundary value conditions by shifted Chebyshev approximations T.-T. LEE and S.-C. TSAY.....	1225
Complexity of the diagnosability problem for a general model of diagnosable systems A. SENGUPTA, A. SEN and S. BANDYOPADHYAY.....	1235
Adaptive control for a d.c. motor controlled by a group of amplidynes using bilinear models M. DE LA SEN and J. C. SOTO.....	1245
Identification of MIMO continuous-time models by indirect methods H.-P. HUANG, C.-L. CHEN and Y.-C. CHAO.....	1281
Periodic linked time systems Y. LIN.....	1299
Methods of steady-state simulation for gas networks A. J. OSIADACZ and K. PIENKOSZ.....	1311
Remarks on discrete-time servomechanism design for parabolic distributed parameter systems T. KOBAYASHI.....	1323
General pole restriction controller design C. C. LIM, K. L. TEO and C. C. HANG.....	1335
Learning behaviours of hierarchical structure stochastic automata operating in a non-stationary multi-teacher environment N. BABA and Y. MOGAMI.....	1345
Optimal constant due-data assignment and sequencing T. C. E. CHENG.....	1351

NUMBER 8

Integral least-squares techniques for frequency-domain model reduction A. H. WHITFIELD and N. G. WILLIAMS.....	1355
Discrete-time forward-pass smoothers in distributed-sensor networks K. WATANABE and S. G. TZAFESTAS.....	1375
Simultaneous state and parameter estimation and location of sensors for distributed systems H. MALEBRANCHE.....	1387
Automation, skills and the content of work W. CAVESTRO.....	1407

Optimal pole-placement for state-feedback systems possessing integrity L. S. SHIEH, H. M. DIB, S. GANESAN and R. E. YATES.....	1419
Convergence analysis of a computational method for time-lag optimal control problems K. H. WONG.....	1437
State-space approach to H_{∞} optimal control M. J. GRIMBLE.....	1451
Optimal design of FIR linear phase digital filters via convex quadratic programming method Y. OHASHI, H. KANDO, H. UKAI and T. IWAZUMI	1469
Novel approach for determining optimal treatment regimen for cancer chemotherapy E.-M. ABULESZ and G. LYBERATOS	1483
Hybrid connections and time-scales in non-linear systems E. C. MARTINEZ.....	1499
Continuous self-adaptive control using a smoothed variable structure controller J. A. BURTON and A. S. I. ZINOBER.....	1515
Design of decentralized reliable controllers for large-scale systems M. G. DARWISH and H. M. SOLIMAN	1529
Design of digital controllers for double-loop systems based on series expansions H. INOOKA, T. WATANABE and Y. IMAI.....	1539
Algorithm by hybrid splines K. TORAICHI, I. SEKITA and R. MORI	1547
Identification of non-linear output-affine systems using an orthogonal least-squares algorithm S. A. BILLINGS, M. J. KORENBERG and S. CHEN	1559
Linear model following systems with constrained control A. BENZAOUIA and C. BURGAT.....	1569
Multi-time method for large-scale filtering J. CHANDRA, G. S. LADDE and O. SIRISAENG TAKSIN	1579
Evaluating strategies for generalized bandit problems K. D. GLAZEBROOK and N. A. FAY	1605
Dynamic feedback control of stochastic-parameter systems E. YAZ.....	1615
Cost optimal-(N^*, n^*) parallel reliability systems N. VENUGOPAL, C. RAMI REDDY and M. MEENAKSHI BAI	1623
L_2-stability of linear time-varying systems: conditions on derivatives S. RAMARAJAN	1631
Effect of time delay on system performance via single term Walsh series approach K. R. PALANISAMY, K. BALACHANDRAN and R. S. RAMASWAMY	1635
Control problem for linear systems with input derivatives control L. DAI.....	1645
Maintenance policies in markovian deterioration models of parallel unit systems T. TANINO and F. FUKAZAWA	1655
Use of Green's function matrices for systems of diffusion equations H. C. TUCKWELL	1663

Graphical-structure-based models for routing problems A. I. ALI and C.-H. HUANG.....	1667
Multi-model control of MIMO systems: location and control algorithms G. ALY, A. BADR and Z. BINDER	1687
Model for the epigenetic mechanism during embryogenesis: a study of oscillations in a multiple-loop biochemical control network A. K. SAHA and P. K. TAPASWI.....	1699
Decomposition algorithm of dynamic programming for large-scale time-delay systems J.-N. LIN and Y.-Z. LU.....	1719
Identifiability analysis of interconnected zero-memory composite systems Z. HASIEWICZ.....	1731
Generalization of I-O-W models for waste management policy analysis and national planning SUSHIL and P. VRAT	1749
Two- and three-dimensional tori bifurcating from interactions of dynamic modes P. YU and K. HUSEYIN.....	1763
Constrained control algorithm for non-linear control problems H. M. AMMAN and H. JAGER	1781
Preference structure on alternatives and judges in a group decision problem—a fuzzy approach J. R. RAO, R. N. TIWARI and B. K. MOHANTY	1795
Integration of priority dispatching and due-date assignment in a job shop T. C. E. CHENG.....	1813
Power system excitation and governor control design via time-scale decomposition N. P. SINGH and Y. P. SINGH	1827
Analysis of time-delay systems via shifted Chebyshev polynomials of the first and second kinds B. M. MOHAN and K. B. DATTA.....	1843
Stability analysis of linear time-varying systems R. K. YEDAVALLI and S. R. KOLLA	1853
Novel approach to hierarchical control via single-term Walsh series method J.-M. ZHU.....	1859
Suboptimal sensors location in the state estimation problem for stochastic non-linear distributed parameter systems J. KORBICZ, M. Z. ZGUROVSKY and A. N. NOVIKOV.....	1871
Reduction of high-order discrete-time systems H. HAMIDI-HASHEMI and C. T. LEONDES	1883
Further results on controllability and the linear equation $Ax = b$ J. LOUISELL and E. B. LEE.....	1891
Recursive parameter estimation for semimartingales A. THAVANESWARAN and M. K. HABIB.....	1901

Duality for programs involving non-separable objective functions C. H. SCOTT, T. R. JEFFERSON and S. JORJANI.....	1911
Correspondence	
Comments on 'Positivity and (L_2 -)stability with a cubic non-linearity' J. L. WILLEMS.....	1919

NUMBER 10

Partial error decoupling, in reduced-order filters C. S. SIMS	1923
Game of two cars with containment probability as cost function Y. YAVIN and H. TÖNSING.....	1931
Similarity between systems and direct sum decomposition Y.-H. MA and Y. LIN.....	1941
On-line system identification with an adjustable estimation interval W.-T. WU, W.-H. OU and K.-C. CHEN.....	1955
Approaches to the optimizing control problem J. E. ELLIS, C. KAMBHAMPATI, G. SHENG and P. D. ROBERTS.....	1969
Extended adaptive lattice filters for disturbance input processes K.-F. CHIANG.....	1987
Critical and non-critical human error modelling in redundant systems: modified block diagram approach B. S. DHILLON and S. N. RAYAPATI.....	1999
Robustness optimization in LQG multivariable systems with time-varying non-linear perturbations F.-H. HSIAO and B.-S. CHEN.....	2019
Solving non-linear equations by simulation H. T. LAU.....	2047
Temperature control of tissue by transient-induced-microwaves P. K. DHAR and D. K. SINHA.....	2051
Worst-case error analysis of the aggregation method, with application to the selection of reduced-order models G. J. LASTMAN and N. K. SINHA	2057
Decentralized adaptive control of robotic manipulators H. TAMURA and K. NAGAHAMA	2067
Learning automaton as a model to simulate and analyse learning behaviour in rats M. KIMURA, T. OUCHI, H. NAKAHAMA, K. SHIMA and S. SAITO	2079
Excitation controller design of synchronous machines with dynamic and proportional-plus-integral output feedback D. P. PAPADOPOULOS.....	2091
Sensitivity analysis of descriptor distributed parameter systems M. KODA	2103
Travelling salesman problem solved with simulation techniques W. CONLEY.....	2115

Robust stability for linear time-delay systems with linear parameter perturbations T.-J. SU, I.-K. FONG, T.-S. KUO and Y.-Y. SUN	2123
Singular perturbation method for boundary value problems in two-parameter discrete control systems M. S. KRISHNARAYALU and D. S. NAIDU	2131
Correspondence	
Hypersurface attractivity for systems with delays driven by min-max controller E. CHERES	2145

NUMBER 11

Algebraic condition for observability of non-linear analytic systems H. SIRA-RAMIREZ	2147
Automatic diagnosis from electrocardiograms (ECGs) J. W. ABDUL-SADA and H. J. ABBAS	2157
Generation of gaussian pseudo-random process with specific correlation properties J. W. ABDUL-SADA and M. K. MAHMOOD	2163
Output feedback control using reduced order models A. FELIACHI	2169
Existence and uniqueness of solutions for non-linear singular (descriptor) systems J.-Y. LIN and Z.-H. YANG	2179
Stabilization of discrete adaptive systems with bounded disturbances M. S. MAHMOUD and A. A. BAHNASAWI	2185
Design of an on-line controller for microcomputer implementation M. S. MAHMOUD, K. H. RAHOUMA and S. Z. EID	2195
Generalized age-dependent model for estimation of mean survival time in the presence of two competing risks S. BISWAS and H. S. NOOR	2211
Checkpointing strategies in database systems and their performance evaluation R. S. PAMULA and P. K. SRIMANI	2223
Robust fixed-lag smoother for linear systems including outliers in the system and observation noises M. TANAKA and T. KATAYAMA	2243
Optimal control of system with continuous and discrete state variables N. SANNOMIYA, Y. NISHIKAWA, M. OKUBO and T. TSUDA	2261
Real modal analysis with complex conjugate eigenvalues J. A. GIBSON	2275
Design of variable structure system controllers for large-scale multivariable systems using eigenvalue placement A. FUCHS and R. MUKUNDAN	2283
Diagnosis model for dynamical systems. Part 1: Discrete system Y. ISHIDA and H. TOKUMARU	2291

Diagnosis model for dynamical systems. Part 2: Continuous system Y. ISHIDA and H. TOKUMARU	2307
Well-posed linear models for large-scale zero-memory composite systems Z. HASIEWICZ	2321
Stability of linear systems with periodic feedback and sampled-data systems J. TOKARZEWSKI	2339
Modelling and identification of offshore towers with general damping K. A. MOUSTAFA, K. ASFAR and F. DRIES	2367
Assessing the operational analysis robustness of flexible manufacturing systems modelling M. P. FANTI, B. MAIONE, Q. SEMERARO and B. TURCHIANO	2381
Method of steady-state simulation of any gas network A. J. OSIADACZ	2395
Realization of Petrinets: a system theoretic approach B. SAHA and S. BANDYOPADHYAY	2407
Allocation of discrete resource in order transmission hierarchical organization W. CZUCHRA	2419

NUMBER 12

Block pulse function approach for the identification of Hammerstein model non-linear systems Z. H. JIANG	2427
Direct and blockwise identification of decomposable systems using recursive least-squares algorithm J. JIANG and R. DORAISWAMI	2441
Controllability indices of sampled-data systems T. HAGIWARA and M. ARAKI	2449
Application of single-step method of block-pulse functions to the optimal control of linear distributed-parameter systems J.-M. ZHU and Y.-Z. LU	2459
Spline function approach to digital signal processing M. KAMADA, K. TORAICHI and R. MORI	2473
Window functions obtained by convolution integrals of rectangular windows K. TORAICHI, M. KAMADA, S. ITAHSHI and R. MORI	2491
Analyses of crime control by a total criminal justice system model of feedback type with aging effect considered H. ETO and J. SANO	2507
Edge detection based on human visual response M. K. KUNDU and S. K. PAL	2523
New minimal order design algorithm for linear multivariable systems Y. S. APTE	2543
Facility location problem on a network under multiple criteria—fuzzy set theoretic approach J. R. RAO and K. SARASWATI	2555

Orbital stability of periodic solutions of autonomous systems with impulse effect P. S. SIMEONOV and D. D. BAINOV	2561
Realization of ε-invariance using impulse control in systems of delay equations A. S. C. SINHA	2587
Actuator fault detection and isolation in linear systems M. S. PHATAK and N. VISWANADHAM	2593
Optimal replacement policy for general parallel reliability system N. VENUGOPAL, S. SHAFFI AHAMED and M. MEENAKSHI BAI	2605
Analysis of two-unit stand-by system with switch failure Y. V. S. SARMA and H. P. HINES	2619
Inventory model for a system with monotonically increasing decay of raw materials and a decaying single finished product F. RAAFAT	2625
New multi-level algorithm for linear dynamical systems M. F. HASSAN	2631
Determination of path identifiers for reliability analysis of a broadcasting network using Petri nets V. KUMAR and K. K. AGGARWAL	2643
Cluster points and stability M. E. EVANS	2655
Pole-assignment with periodic output feedback: computer assisted study on a 2-dimensional linear system M. E. EVANS	2661
Prediction by dual mode GMDH K. HARA, T. YAMAMOTO and K. TERADA	2673
Stability of time-varying systems using a simple transformation S. RAMARAJAN	2683
Subject index	2687
Author index (with titles)	2699
